GEN GRANT AND THE SOUTH

INT TELEGRAPH TO THE TRIBUNG!

WASHINGTON, Aug. 19 .- The Sunday Herald has

taken pains to interview some of the intimate per-

sonal friends of ex-President Grant here, on the ref-

to the attitude held by Gen. Grant in the closing

lows: The friends of ex-President Grant are partic-

were issued at the direct request of some of Presi-

dent Hayes's most intimate friends, who represented

to President Grant that Gen. Hayes desired to enter

office unembarrassed by a necessity of following any

decision his predecessor might make regarding the

contesting governments. They deny that President

Grant ever seriously entertained an idea of recogniz-

ing Gov. Nicholls. They claim that the entire re-

sponsibility for the present situation in Louisiana

rests solely with President Haves, and denounce Seey.

Sherman's effort to divide it with Gen. Grant as an

claim, they reiterate again their oft repeated and oft

exploded charge that President Hayes's Louisiana

Commission sent down to New-Orleans to comprom-

ise things, was packed in the Nicholls interest. In

other words they persist that Grant is entitled to

whatever credit may attach to a design to maintain

carpet-bag rule in Louisiana, and glory in the alle-

gation that up to the last moment of his official ca-

reer he was really opposed to home rule for the

will to-merrow issue a circular to all Collectors of Inter

nal Revenue, directing them not to allow within their

several collection districts more than one person related

to the Collector to hold an Internal Revenue appoint

ment, and ferbidding the employment under them of

more than two persons related to each other. This reform is the result of an investigation which the Commis-

sioner of Internal Revenue has been conducting for

the past few weeks. The answers to his inquiries

as to the number of relatives holding revenue offices are very peculiar, and show a

astounding development of nepotism in some sections of the country. This is more especially true of the South-

ern States, New-York, Pennsylvania and New England,

In one district in Keutucky there were thirty-one per

sons related to each other holding revenue offices,

out of some forty appointments. In one of the New-

England districts there are five or six. The North-

west is more exempt from this abuse than any other sec-

tion of country. The Chicago Collector reports no per

son in office related to himself, and no persons related to

FRAUD IN SUGAR IMPORTATION.

Spec.al Agent Chamberlain has submitted his report of an investigation of alleged fraudulent colored sugars imported at the perts of Boston, New-York, Philadelphia and Baltimore. He finds that this class of su-gars are imported at all the ports named, but in larger quantities at New-York than elsewhere. He consulted ngar merchants and refiners at all of the ports named, and all of them concur in the statement that the Demerara sugars known in the market reports as "Clark erystals" are artificially colored for the American market

These sugars will polarize higher than any other sugars known to the trade, and if their importation is to be allowed without check by the Government, it will work great injury to refiners who do not use them, and reduce the amount of duties collected very largely. Many persons engaged in the sugar trade state that these Demerara sugars are refined almost to the purity of Rock Candy by the same process used in purging the crystal from impurities, but it is doubtful whether they would be classed as refined sugars in the commercial sense.

The Treasury Department has received the report on weights and ganges in the New-York Custom House, made by the Commission investigating the officers of that office. The Post-office Department announces that the steam-

ship Cassini will be dispatched from New-York direct to Pernambuco and Balia on the 23d inst., conveying United States main for Brazil and the River Plate. THE FRENCH ELECTORAL CAMPAIGN. PARIS, Aug. 19, 1877.

H. Ruger, whose headquarters are at Atlanta, Ga. In-stead of three regiments of infantry in the Department of the Gulf, as was the case in March last, there M. Gambetta, in his recent speech at Lille, said the mere reflection of the 363 would be an inadequate protest against the 16th of May [the removal of the Simon Cabinetj, and would not give sufficient authority for finishing with this policy of oscillation and subter-fuge. He expressed the belief that his former estimate of 400 would be exceeded, now that Liberal rivalries had Kentucky and Tennessee lying west of the Tennessee River. The commanding officer is Brig.-Gen. C. C. ceased. Recruits had been gained, and the best results would be obtained in the West, Centre and Northwest a part of France hitherto most apathetic, but which now

began to talk of liberty and republicanism.

Ducrôt, who commands at Bourses, with being the instigator of these attreks. The Moniteur thinks it quite allowable that Gen. Ducrôt, ap-proving a policy of force, should regret not being in tue Cabinet to carry out his programme, but considers it de-plorable and serious that he should stimulate a break-up of the Ministry.

THE ARGENTINE REPUBLICAN DEBT. LONDON, Saturday, Aug. 18, 1877.

The Times referring to foreign debt of the Argentine Confederation, says: "The dividends and drawings on the debt have not been provided for from the revenue, and the prospect of a further deficit is so decided this year that what has been true in the past is plainly true now. The dividends have been met partly by borrowing in Loudon on pledged stock and partly note issues in Buenos Ayres."

THE CANADIAN FISHERY QUESTION. TORONTO, Aug. 18 .- A telegram to The Globe from London gives the following extract from an article in The Times on the Fisheries Commission : " No sooner," itsays, "did the Commission begin business than the itsays, "did the Commission begin business than the conviction arose that another Commissioner and another treaty would be necessary to settle the dispute. This would be a very lame and impotent conclusion of its labors. It would have been better to have had no Wassington Treaty than to have failed to provide for a settlement of the difficulty. It was intended to remove all points in dispute, but there is as much in dispute as ever. The limes seen in clear way out of the numerous difficulties. The best course, perhaps, would be for the two gives the Commissioners power to decide the whole of the cases laid before them, giving such an enlarged interpretation to the clauses of the treaty as would do substantial justice between the disputants.

I am, therefore, surprised that you took the liberty to an me in the columns of THE TRIBUNE, on the 10th instant. as preparing "for the Gubernatorial race in New-Jersey." In your issue of the 11th inst., you inquire. Who was the Jones who was sent from Englewood to Cincinnati instructed to vote for anybody except Mr. survey has been made, and a channel of 250 feet in width and eighteen feet in depth exists. THANKS TO MARSHAL PAYN.

To the Editor of The Tribune. SIR: A perusal of the article in THE TRIB-UNE to-day might give the impression that the United States Marshal, Mr. Lewis Payn, had exercised his an therity over the steamer Denmark unwarrantably, and in such way as to cause needless suffering and trouble to owners, crew or passengers. This is a great mistake. The Marshal has performed a disagreeable duty thrown upon him by the law with a spirit of kindly interest and indujence to the extent that his duty permitted, and I wish to extend to him in this public manner my warm thanks for such netion.
